

Universita degli Studi della Calabria

Dipartimento di Chimica

Dottorato di Ricerca in
“Scienze e Tecnologie delle Mesofasi e dei Materiali
Molecolari”

Dottorato Internazionale XXI° Ciclo

Ph.D. Thesis

**Optical and electrical properties of
polymer dispersed nanoparticles.**

Supervisore
Prof. G. Chidichimo

Coordinatore
Prof. C. Versace

Candidato
Dott. Alexander Tyurin

Anno Accademico 2007-2008

INDEX

Chapter 1

INTRODUCTION	1
REFERNCES	3

Chapter 2

MODELS TO CALCULATE THE ELECTRIC AND OPTICAL PROPERTIES OF POLYMER DISPERSED CONDUCTIVE SILVER NANOPARTICLES	
2.1 The theoretical model for electric conduction in nanoparticle/polymer composites.	5
2.2 Optical properties of nanoparticle/polymer composites.	10
2.3 Temperature dependence of nanoparticle films physical properties.	14
REFERENCES	19

Chapter 3

EXPERIMENTAL PART AND DATA DISCUSSION	
3.1. general consideration	21
3.2 Sample preparation	23
3.3 Morphology investigation	24
3.4 The electrical conductivity of the PDMNP films.	32
3.5 Optical properties.	45
REFERENCES	56
CONCLUSIONS	58
